PROFESSIONAL SUMMARY

Software Engineer with over 1 year of experience building end-to-end features using React, TypeScript, and C# .NET. Proven track record in developing AI-powered automation frameworks (MCP, SDD) and securing enterprise applications. Strong foundation in full-stack development (PERN/MERN), CI/CD pipelines, and cloud-integrated systems, ready to contribute to high-scale planning platforms.

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, C++, C#, SQL

Frontend: React.js, Next.js, HTML5/CSS3, Tailwind CSS, shadcn/ui

Backend: Node.js, .NET Core, REST/GraphQL APIs, Express

Databases: PostgreSQL, SQL Server, MongoDB, NoSQL

Tools & DevOps: Docker, CI/CD Pipelines, GitHub Copilot, Git, Playwright

AI & Automation: Agentic AI, MCP Servers, Transformers, SDD Framework

PROFESSIONAL EXPERIENCE

Software Engineer 1

July 2023 – Present

MAQ Software

- Developed and maintained end-to-end features for enterprise web applications using **C# .NET** for the backend and **React.js/TypeScript** for the frontend.
- Integrated **AI Agents with MCP (Model Context Protocol) servers** to automate resource access and testing workflows, enhancing developer productivity via GitHub Copilot integration.
- Designed and implemented the **SDD (Speck it) framework** for automated end-to-end testing using **Playwright**, reducing regression testing time by 30%.
- Identified and mitigated critical security vulnerabilities, including **XSS, CSRF, and Command Injection**; upgraded encryption standards from DES to **AES** and improved authentication with rate limiting.
- Owned the deployment lifecycle by creating and managing **CI/CD build pipelines** and implementing **Feature Flags** for controlled release testing.

KEY PROJECTS

Classroom Manager | PERN Stack, TypeScript

2024

- Built a full-stack educational platform with **Role-Based Access Control (RBAC)** for students, teachers, and admins.
- Implemented complex CRUD operations with advanced filtering, search, and pagination using **PostgreSQL and Refine**.
- Integrated real-time analytics dashboards to visualize enrollment trends and user distribution metrics.

Neural Machine Translation | Python, Transformers, PyTorch

2024

- Developed a Transformer-based model for English-Urdu translation, achieving a 22+ point improvement over baseline BLEU scores.

- Utilized **Python** data-augmentation techniques (back-translation and weighted-back translation) to optimize low-resource language performance.

EDUCATION

B.Tech in Computer Science and Engineering

2021 – 2025

National Institute of Technology (NIT), Hamirpur

- CGPA: 8.17/10.0
- Relevant Coursework: Object-Oriented Programming, DBMS, System Design, Operating Systems, Computer Networks.
